

Credit Risk Modeling

Credit Risk Modeling: Theory and Applications

IS A PART OF THE
PRINCETON SERIES IN FINANCE

SERIES EDITORS

Darrell Duffie Stephen Schaefer
Stanford University London Business School

Finance as a discipline has been growing rapidly. The numbers of researchers in academy and industry, of students, of methods and models have all proliferated in the past decade or so. This growth and diversity manifests itself in the emerging cross-disciplinary as well as cross-national mix of scholarship now driving the field of finance forward. The intellectual roots of modern finance, as well as the branches, will be represented in the Princeton Series in Finance.

Titles in this series will be scholarly and professional books, intended to be read by a mixed audience of economists, mathematicians, operations research scientists, financial engineers, and other investment professionals. The goal is to provide the finest cross-disciplinary work in all areas of finance by widely recognized researchers in the prime of their creative careers.
